MOBILE RELAY ASSOCIATES)	File No. 0003755550
)	
Petition for Reconsideration filed by National)	
Science and Technology Network, Inc.)	

Released: September 13, 2010

3. NSTN seeks reconsideration of the grant of the above-captioned application. It suggests that the facilities authorized under Call Signs WQGU853 and WQIM482 were not timely constructed, so the authorizations should be deemed to have terminated automatically.⁶ NSTN provides no evidence that the stations were not timely constructed. We therefore deny its petition for reconsideration. As we stated in another proceeding with respect to Station WQIN669, “If NSTN believes that it has sufficient evidence of non-construction or permanent discontinuance of operation, it may file a separate request for license

⁹ See Petition at 2-3. NSTN also appears to suggest that the above-captioned application did not comply with Section 90.313(c) of the Commission's Rules, 47 C.F.R. § 90.313(c), which provides that a licensee may not add a 470-512 MHz frequency pair unless its already-assigned frequency pairs are at full capacity. See Petition at 2. We conclude that Section 90.313(c) is irrelevant to the present matter, because the above-captioned application did not add any frequencies that were not already assigned to MRA at that location.

cancellation.”⁷

4. Accordingly, IT IS ORDERED that, pursuant to Sections 4(i) and 405 of the Communications Act of 1934, as amended, 47 U.S.C. § 154(i), 405, and Section 1.106 of the Commission’s Rules, 47 C.F.R. § 1.106, the petition for reconsideration filed by National Science and Technology Network, Inc. on March 25, 2009 IS DENIED.

5. This action is taken under delegated authority pursuant to Sections 0.131 and 0.331 of the Commission’s rules, 47 C.F.R. §§ 0.131, 0.331.

FEDERAL COMMUNICATIONS COMMISSION

Scot Stone
Deputy Chief, Mobility Division
Wireless Telecommunications Bureau
